

BrytEnergy

This statement is to assure that Bryt Energy's renewable electricity products meet the Quality Criteria of the World Resources Institute's GHG Protocol Scope 2 Guidance (2015).

SE Advisory services assure that these products have met the Quality Criteria of the GHG Protocol (2015) and The Electricity (Fuel Mix Disclosure) Regulations (2005) for the period 1st April 2025 to 31st March 2026.

As a result, end users of this product are enabled to report zero Scope 2 market-based carbon emissions for the electricity associated with the supply under this product.
